

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appln. No. 09/739,642

3. (Amended) The thermoformed article according to Claim 2, wherein the crystalline olefin resin contains a propylene homopolymer.

4. (Amended) The thermoformed article according to Claim 2, wherein the crystalline olefin resin contains a propylene homopolymer having an mmmm pentad % of not less than 0.95.

5. (Amended) The thermoformed article according to Claim 2, wherein the thermoformed article is a sheet having a thickness of from 50 to 700 $\mu$ m.

---

12. (Amended) A laminated molding article, which comprises:

(i) a thermoformed article containing a crystalline olefin resin, and having a surface roughness (Ra) of not more than 2 $\mu$ m, a total haze of not more than 4% and an inner haze of not more than 3%; and

(ii) a substrate containing a crystalline olefin resin.

13. (Amended) The laminated molding article according to Claim 12, wherein the crystalline olefin resin contains a propylene homopolymer.

14. (Amended) The laminated molding article according to Claim 12, wherein the crystalline olefin resin contains a propylene homopolymer having an mmmm pentad % of not less than 0.95.

---

**Please add the following new claims:**

---

26. (New) The thermoformed article according to Claim 2, wherein the thermoformed article has a surface roughness (Ra) of not more than 0.05 $\mu$ m.

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Appln. No. 09/739,642

*Amended*  
27. (New) The laminated molding article accordingly to Claim 12, wherein the thermoformed article has a surface roughness (Ra) of not more than 0.05 $\mu$ m.
